MURRAY, Utah (ABC 4 Utah) - When a local mom of four showed up at [Glenmore Village](#), Thursday morning, she had no idea she would be leaving with brand new kitchen appliances for her home.

Melissa Christensen is a deserving mother who puts everyone else before herself, according to her sister, Amy. Christensen has a child with autism and another child with Microcephaly, a condition that causes a baby's head to be significantly smaller than average, due to abnormal brain development. In addition, Christensen's son's body does not absorb nutrients from food and requires TPN (nutrition through an IV line) that must be refrigerated. Unfortunately, Christensen's dishwasher recently broke, and her family has not been able to buy a new one, making sterilizing the many syringes and medical supplies they are constantly using very difficult to clean.

That is where [Hamlet Homes](#) comes in.

For weeks, the Utah home builder has taken nominations for its kitchen appliance giveaway and selected Christensen shortly after learning her story. The giveaway was possible with the help and generosity of [Contract Appliance Sales](#) in Murray and took place in celebration of the grand opening of a new Hamlet Homes development in Murray.

Glenmore Village is located in Murray at 1300 West 6500 South, Winchester.

Watch the video clip above to see Christensen's heartwarming reaction to the big surprise that aired live on ABC 4 Utah Midday at 11:00 news.
